

Doel Wat is een gedistribueerd systeem? Kenmerken en uitdagingen Welke technologieën waren en zijn er om gedistribueerde systemen te realiseren? Wat zijn de principes van elke technologie? Wat is een webservice, een Service Oriented Architecture (SOA)?

SOA - kenmerken Logical view Message orientation Description orientation Granularity Network orientation Platform neutral

COM/CORBA/... versus webservices

Description

Webservices
Platformonafhankelijk
Over internet
Snelheid minder belangrijk
Bestaande applicatie openstellen via internet
COM/CORBA/...
Performanter
